### ABOUT ME

---

A bright, talented and self-motivated individual who has a strong interest and keen enthusiasm for software and technology particularly in the area of Web Development. Currently looking for an opportunity to join an ambitious forward-thinking company that will offer personal development and make best use of existing skills and experiences.

### EDUCATION

---

#### **MA Magazine Journalism (2018 - 2019)**

Nottingham Trent University

#### **LLB (Hons) Law and Criminology (2015 - 2018)**

Nottingham Trent University

#### **A Level Law (2013 - 2015)**

St Dominic's Sixth Form

### COURSES

---

#### **Software Development Bootcamp, Just IT (2023)**

During this 12-week bootcamp I was able to further grow my understanding of HTML, CSS, JavaScript and Python, as well as be introduced to SQL, with the opportunity of showcasing my knowledge through multiple projects. Building a countdown timer web application helped me grow my knowledge of JavaScript, which I went on to implement when creating my portfolio. I was then pushed out of my comfort with my next project, which involved creating a user input command application which enables users to view and edit film data using Python and SQLite.

#### **Introduction to Web Development, Code First Girls (2021)**

I had the opportunity of being accepted onto Code First Girls' Web Development course where I learnt how to use languages HTML, CSS and JavaScript, as well as the front-end framework, Bootstrap.

#### **Introduction to Python, Code First Girls (2021)**

I was introduced to the current version of Python and covered the different elements of the programming language including, if statements, lists, APIs and more.

**Commonwealth Bank Virtual Experience Program Participant (2020)**

Participated in the open access Commonwealth Bank Virtual Experience Program with InsideSherpa, covering different areas in Technology including:

- Web Development
- UX/UI Design
- Cyber Security
- Data Science
- Artificial Intelligence

**EMPLOYMENT**

---

**Hutch****Supervisor (March 2022 – March 2023)**

As a supervisor for an e-commerce shipping company, I've gained so many transferable skills, for example, balancing different tasks simultaneously, adapting to our company's software changes and working with a range of different personalities. Some of my many roles include scheduling staff, managing the team, making sure all deadlines are met and communicating with suppliers.

**NuPrint Magazine, ASBO Magazine****Music Journalist (2019 – 2020)**

My time as a music journalist enabled me to use more of my research and communication skills when writing and conducting interviews with artists. I had to work on a tight schedule, at times juggling more than one interview, to make sure that interviews were written up, edited and sent on time to be published, with any changes or challenges promptly communicated to the director.

**IndeedFlex****General Staff (2018 – 2022)**

I had various roles during my time with IndeedFlex (formerly Syft) such waiting tables, helping with events and warehouse operative. Nearly each shift I would be in a new role with new people which allowed me to quickly adapt to my surroundings and adjust to working in a new team.

**INTERESTS**

---

I run a home bakery business which I started during my time at university that has overtime increased my ability to work under pressure. Running my business alongside studying or working has helped me manage my time more efficiently which I am able to apply in other areas of my life. I also like to read and go to the gym which gives me peace of mind. I believe in having at least one hobby which helps you relax and look after yourself is important.
